Here is a citation: (Kacelnik and Brito e Abreu 1998) An inline citation has no [] around it, like this: Rivalan, Winter, and Nachev (2017).

Methods and Materials

Guidelines can be included for standard research article sections, such as this one.

Any "personal communications" relating to unpublished data should be incorporated within the main text, in the following format: (Author Initial(s) and Surname, personal communication, Month and Year). Authors should have permission from anyone named in this way and should be aware that a supporting letter will sometimes be requested. Within the Materials and Methods and/or figure legends, we encourage authors to provide complete information about their experiments, analyses, or data collection to ensure that readers can easily understand what was measured and analysed, and can accurately perform the relevant protocols. In cases where a new method within the submission would benefit from step-by-step protocols in addition to the methods described in the article, we would encourage authors to also consider submitting a detailed protocol to Bio-protocol. On first mention, please provide details of any manufacturers in the following format: company name, city, country (or state, if based in the United States).

Mauris turpis nisl, congue eget velit sed, imperdiet convallis magna. Nam accumsan urna risus, non feugiat odio vehicula eget.
